reference

IMPORTANT SAFETY NOTICE & TIPS:

Please read operation guide carefully and follow below basic safety precautions.

1. Use the canister according to user manual instruction.
2. Clean the canister before use and dry it in time after use.
3. Do not vacuum immediately after putting hot food in the canister.
4. The vacuum time depends on canister capacity and size of food.
5. Keep the canister far away from fire to avoid damages.
6. The canister is dishwasher safe (without the lid).
7. The canister cannot be used with microwave.
8. Do not clean the canister with corrosive detergents or hard items. Wiping it with a soft cloth is recommended.
9. The inevitable scratches in transport on canister will not impact use.
10. Do not disinfect the canister with hot water over 70°C.
11. The canister is for its intended use only.
12. Do not operate it upside down.

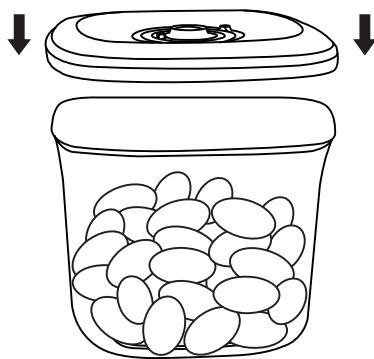

PRODUCT STRUCTURE

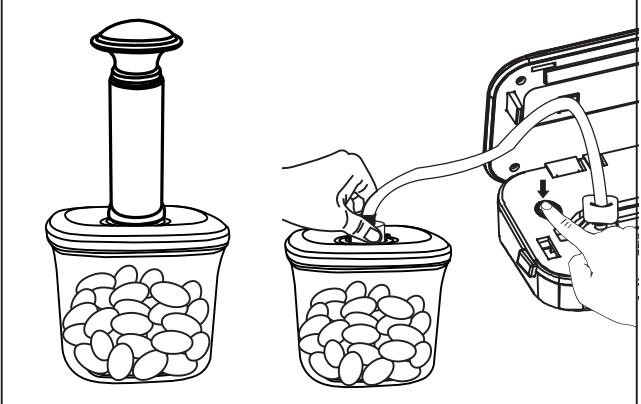

OPERATION INSTRUCTION

Note: After reach the vacuum pressure, stop excessive vacuuming to avoid damage to the canister.

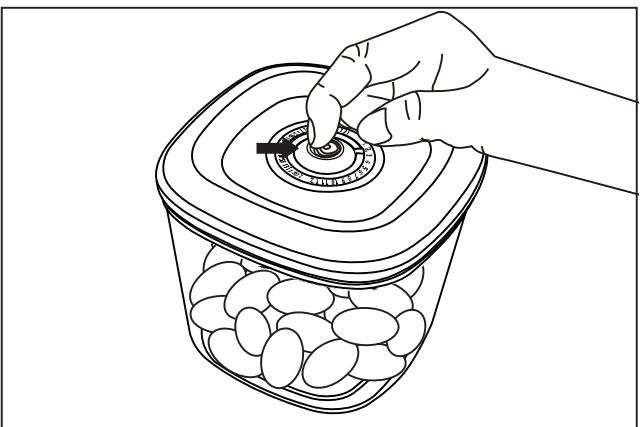

1. Place the food at least 3cm/1.2 inch from the top edge of the container and close the lid.

2. After closing the lid, use the vacuum pump, align the suction port and activate the vacuum pump to start vacuuming, or use it with the vacuum sealer.

3. When the sealing cap is dented, it's finished working and reach the vacuum status, and the pointer on the time compass can be adjusted to the current date.

4. When need to open the lid, gently pull the sealing cap sideways to deflate and then open the lid.

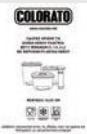

INSTRUCTIONS

1. Vacuum preservation cannot replace freezing or refrigeration.
2. The food to be kept fresh should be fresh food, not stale or spoiled food.
3. For juicy food, the liquid should not exceed half of the canister to avoid being sucked into the vacuum pump or vacuum machine.
4. It is recommended that powdered food should not exceed two-thirds of the canister to avoid being sucked into the vacuum pump or vacuum machine.
5. The canister should be cleaned without sundries before use, and it should not be damaged, otherwise the vacuuming is not available.
